Hi Michael,

I am currently doing a project at South Metro Tafe, I am in the design stage of an Autonomous Vehicle with a lifting mechanism that should be capable of lifting 1000 kg. At the minute we have decided the 274 model is the best option. I need to get a total cost for the project so if I could get a price on that. Can you recommend the best air compressor to use, at the moment we are looking at the boss air suspension.

Any further information you can give me or advice would be much appreciated.

Regards,  
Robert Williams

Hi Michael

My mobile no. is 0450905003

I think it is Firestone, I have attached the assembly order number sheet I got from the website.

Regards,

Robert
